# Contents of Volume 75 1996/1997

Alefeld G, Lenhardt I, Mayer G: On multi-splitting methods for band matrices 267

Bao G: Numerical analysis of diffraction by periodic structures: TM polarization 1
Boffi D, Lovadina C: Analysis of new augmented Lagrangian formulations for mixed finite element schemes 405
Boffi D → Lovadina C
Bornemann FA, Deuflhard P: The cascadic multigrid method for elliptic problems 135
Brink U, Carstensen C, Stein E: Symmetric coupling of boundary elements and Raviart–Thomas-type mixed finite elements in elastostatics 153

Cao W → Guo B
Carstensen C → Brink U
Crandall MG, Lions P-L: Convergent difference schemes for nonlinear parabolic equations and mean curvature motion 17

Dellnitz M, Hohmann A: A subdivision algorithm for the computation of unstable manifolds and global attractors 293
Deuflhard P → Bornemann FA

Ernst OG: A finite-element capacitance matrix method for exterior Helmholtz problems 175

Frutos J de, Sanz-Serna JM: Accuracy and conservation properties in numerical integration: the case of the Korteweg-de Vries equation 421

Govaerts W, Spence A: Detection of Hopf points by counting sectors in the complex plane 43
Grüne L: An adaptive grid scheme for the discrete Hamilton–Jacobi–Bellman equation 319
Guo B, Cao W: A preconditioner for the *h-p* version of the finite element method in two dimensions 59

Hackbusch W, Sauter SA: Composite finite elements for the approximation of PDEs on domains with complicated micro-structures 447
Hohmann A → Dellnitz M

Kinzelbach W → Wagner C

Lenhardt I → Alefeld G
Lions P-L → Crandall MG
Lu H: Galerkin and weighted Galerkin methods for a forward-backward heat equation 339
Luskin M: Approximation of a laminated microstructure for a rotationally invariant, double well energy density 205

Mayer G → Alefeld G

Nataf F, Nier F: Convergence rate of some domain decomposition methods for overlapping and nonoverlapping subdomains 357
Nier F → Nataf F
Novak E, Ritter K: High dimensional integration of smooth functions over cubes 79

Pitkäranta J, Suri M: Design principles and error analysis for reduced-shear plate-bending finite elements 223
Plato R: On the discrepancy principle for iterative and parametric methods to solve linear ill-posed equations 99

Rappaz J, Sanchez Hubert J, Sanchez Palencia E, Vassiliev D: On spectral pollution in the finite element approximation of thin elastic "membrane" shells 473
Rieder A: A wavelet multilevel method for ill-posed problems stabilized by Tikhonov regularization 501
Ritter K → Novak E

Sanz-Serna JM → Frutos J de

Sauter SA → Hackbusch W
Sanchez Hubert J → Rappaz J
Sanchez Palencia E → Rappaz J
Spence A → Govaerts W
Stein E → Brink U
Sugihara M: Optimality of the double exponential formula – functional analysis approach – 379
Suri M → Pitkäranta J

Vassiliev D → Rappaz J

Wagner C, Kinzelbach W, Wittum G: Schur-complement multigrid 523
Wilderotter K: An asymptotically optimal algorithm for approximating bounded analytic functions 397
Wittum G → Wagner C

Xu S-F: Sensitivity analysis of the algebraic Riccati equations 121

Comprehensively covered by *Zentralblatt für Mathematik, Mathematical Reviews,* and *Current Contents*
